

Ornifolks
Northwestern Argentina, November 3–22 2004

**A trip through the provinces of Buenos Aires, Cordoba, Tucumán,
Salta, and Jujuy**

Leaders: Hernán Casañas, Juan Mazar Barnett and Diego Monteleone

For the third consecutive year Ornifolks ran a successful trip to Central and Northwestern Argentina, during November 2004.

This trip included changes to the original itinerary, to optimize the birding.

For 18 days we travelled some 4500 kms along some of the most spectacular and scenic landscapes in the country, the trip providing to be not only very birdy, but photogenic. In spite of some bad weather at a few sites, we came to find a total of 424 bird species.

Some of the highlights we recorded are:

Greater Rhea and the Lesser Rhea (=Puna Rhea) in the flatlands of the Altiplano, and the three species species of flamingoes in the lakes that dot the area. We saw the stunning Chaco Owl in northern Cordoba, but the real treat the even more amazing Lyre-tailed Nightjar we saw near Calilegua NP. In the Yungas as well we had Rufous-throated Dipper and Red-faced Guan, a threatened and near-threatened species, according to BirdLife International. All the possible endemis of this area were also present as Moreno's Ground Dove, Sandy Gallito, Steinbach's Canastero, Cordoba and Olrog's Cinclodes, Cordoba Canastero, Buff-breasted Earthcreeper, Salinas Monjita Tucuman Mountain Finch, White-browed Tapaculo and White-throated Cacholote.

Participants: **Alan Wofchuck and William Heady**
